

OBJECTIVE:Write a program that will display the ASCII Chart with its character and ASCII value in a Listbox when user clicks on “Generate” button.

Code:

```
Private Sub Command1_Click()
```

```
    a = Val(Text1.Text)
```

```
    Text2 = Asc(a)
```

```
End Sub
```

```
Private Sub Label1_Click()
```

```
End Sub
```

```
Private Sub Text1_KeyPress(KeyAscii As Integer)
```

```
    Dim strKey As String
```

```
    Dim strAscii As String
```

```
If Text1.Text <> "" And Text2.Text <> "" Then
```

```
    Text1 = "": Text2 = ""
```

```
End If
```

```
strAscii = KeyAscii
```

```
Text2.Text = strAscii
```

```
    Select Case strAscii
```

```
        Case 13
```

```
            Text1.Text = "Enter"
```

```
        Case 8
```

```
            Text1.Text = "BackSpace"
```

```
        Case 27
```

```
            Text1.Text = "Esc"
```

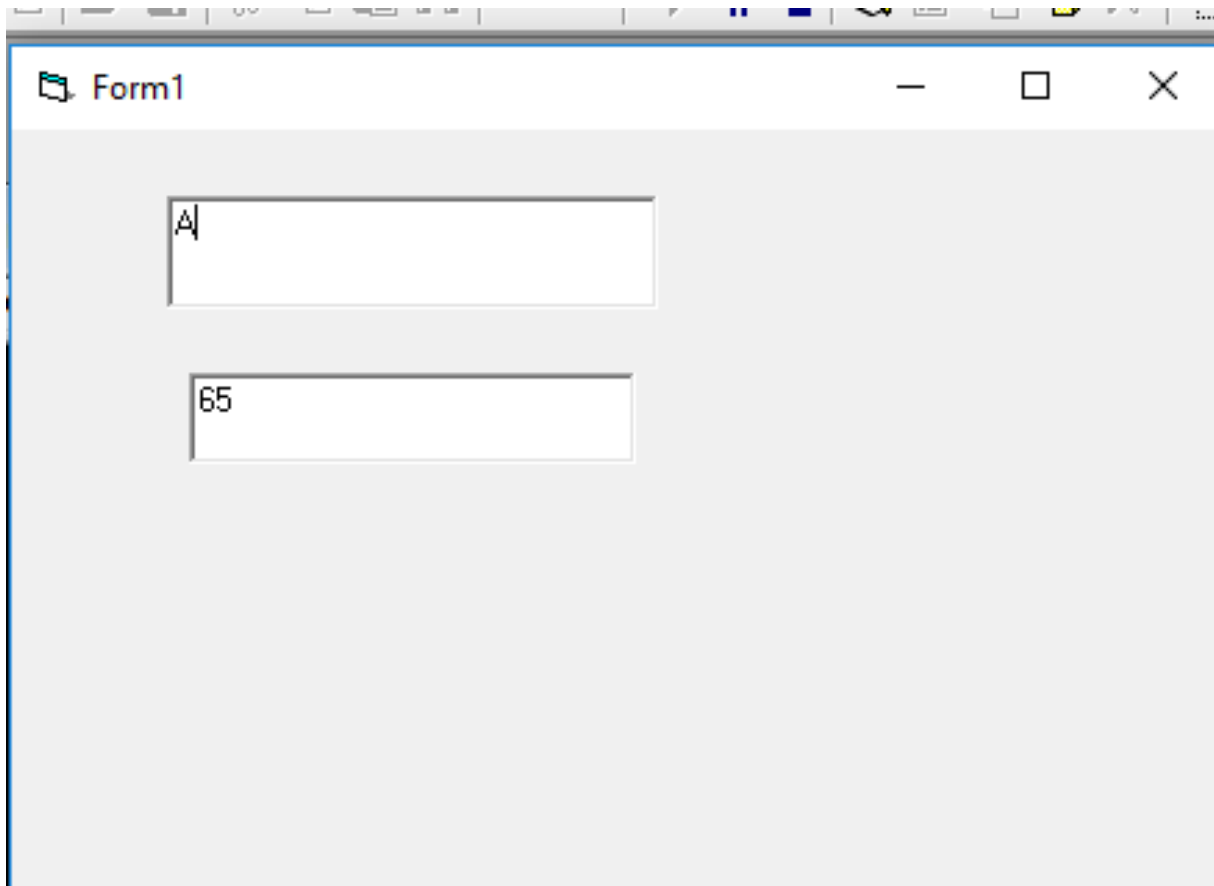

```
        Case 32
```

```
            Text1.Text = "SpaceBar"
```

```
    End Select
```

```
End Sub
```

Output:

A screenshot of a Windows application window titled "Form1". The window has a standard Windows title bar with minimize, maximize, and close buttons. The main area of the window is light gray and contains two white text boxes with black borders. The first text box, located in the upper left, contains the letter "A". The second text box, located directly below the first, contains the number "65".
