

Visual Basic Programming Lab

Environment:-Visual Basic 6.0

Objective: - Write a program that will demonstrate the methods of Record set object in DAO.

Source Code:-

```
Project1 - Form9 (Code)
Command1 Click

Dim db As Database
Dim rs As Recordset

Private Sub Command1_Click()
    rs.MoveNext
    If rs.EOF = True Then
        rs.MoveFirst
    End If
    Call Display
End Sub

Private Sub Command2_Click()
    rs.MovePrevious
    If rs.BOF = True Then
        rs.MoveLast
    End If
    Call Display
End Sub

Private Sub Form_Load()
    Set db = OpenDatabase("biblio.mdb")
    Set rs = db.OpenRecordset("Authors")
    Call Display
End Sub

Private Sub Display()
    Form9.Text1.Text = rs(0)
    Form9.Text2.Text = rs(1)
End Sub
```

Output:-

Form9

Author ID

Author Name
