Objective: - Write a program that will demonstrate the methods of Record set object in DAO.
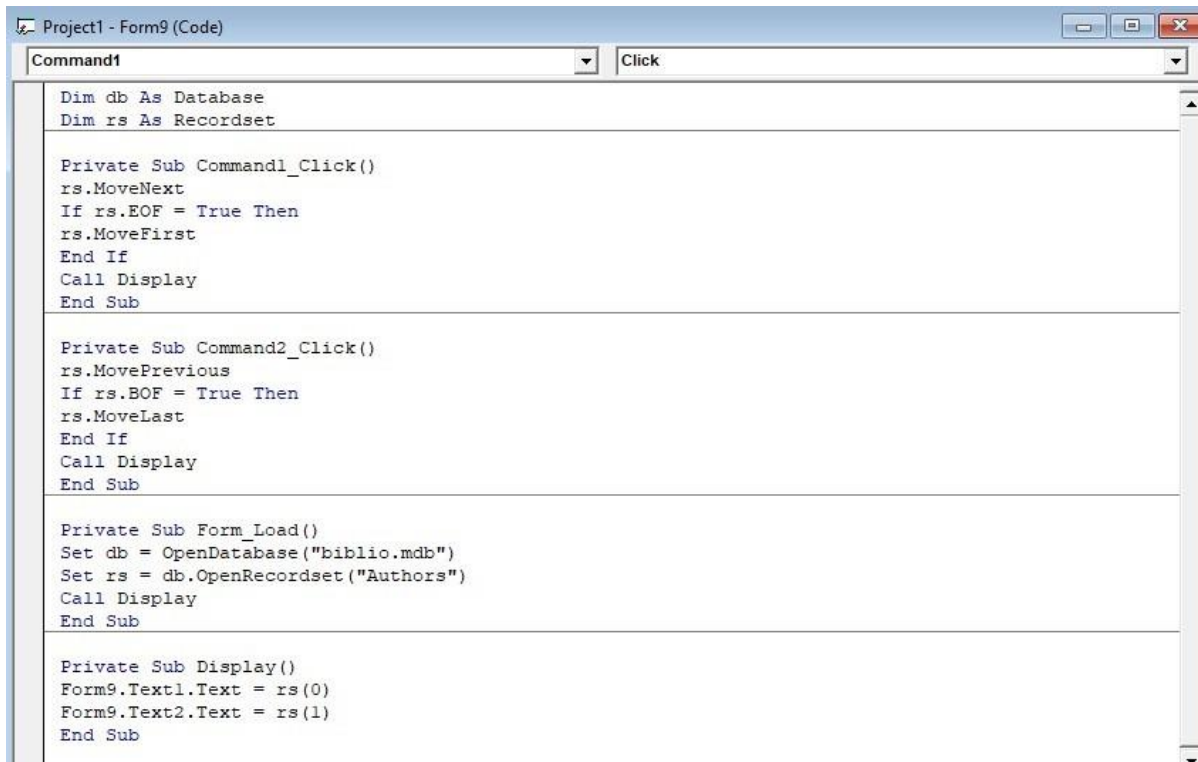

TOOL:-Visual Basic 6.0

 Source Code:-

```
Project1 - Form9 (Code)

Command1                              Click

Dim db As Database
Dim rs As Recordset

Private Sub Command1_Click()
rs.MoveNext
If rs.EOF = True Then
rs.MoveFirst
End If
Call Display
End Sub

Private Sub Command2_Click()
rs.MovePrevious
If rs.BOF = True Then
rs.MoveLast
End If
Call Display
End Sub

Private Sub Form_Load()
Set db = OpenDatabase("biblio.mdb")
Set rs = db.OpenRecordset("Authors")
Call Display
End Sub

Private Sub Display()
Form9.Text1.Text = rs(0)
Form9.Text2.Text = rs(1)
End Sub
```

Output:-

Form9

Author ID   3

Author Name   Boddie, John

Next   Previous
